DESCRIPTION

This 2017 Land Rover Range Rover Sport SD V6 HSE Dynamic is a capable SUV that combines performance with practicality. With a 3.0L diesel engine and a four-wheel drive system, it is built to handle a variety of driving conditions while meeting Euro 6 emission standards. This particular example has covered 51,500 miles, which is a very low mileage for its age, suggesting it has been used sparingly.

The vehicle is equipped with a range of features designed for comfort and utility, including keyless entry and 2-zone automatic climate control to maintain a pleasant cabin environment. Passengers benefit from heated front and rear seats, while the Bluetooth phone connection ensures easy connectivity on the move. For those needing to transport heavy loads, the vehicle offers a towing weight of 3,500 kg, supported by front and rear recovery hooks and a towbar. Practicality is further enhanced by a large boot space, and the driving experience is responsive, with the ability to accelerate from 0-60mph in 6.8 seconds.

FEATURES
